About Us

Baus Power Plant Hire is an organization established and formed to meet the high equipment demands and objectives in the built environment of South Africa and neighbouring countries.

With demands for service delivery ever rising, **we believe our participation and contribution in providing state of the art equipment and support will not only bring relief and provisions to beneficiaries in affected areas**, but also to the overall mandate of the Government and implementing agencies within our environs.

We are a 100% black owned company. One of our key values within the organization is the identification, development and promotion of young talent, with the objective of grooming future leaders who can provide innovative and creative solutions to meet the demands of local markets.

We are a Level 1 BBEEE contributor.

Inventory

To assist you in executing specialised civil works, on site tasks and special equipment transportation needs; Baus Power has a fleet of well-maintained construction vehicles and equipment to suit your needs. We offer flexibility to our clients by hiring out vehicles only or vehicles with a well-trained operator.

Below is a list of plant we hire out:

Cranes

Bobcat (e.g Excavators)

Trailers & Tippers

Bulk Water Movers

Rollers & Ballers

Generators

Earthmovers

TLBs

Key Facts

Target Market

We consider ourselves as a developing company in the market at a stage where South Africa needs efficient and reliable professional service providers to tackle the demanding needs of infrastructure and services. We are from the previously disadvantaged sector of the South African community, and are open to learning and benefiting from any sector of our society.

We therefore target all sources of development within the industry:

- Private developers
- The Corporate environment
- All spheres of Public Sector development
- International areas of development

Our Team

As an emerging entity, our approach and strategy is to grow steadily and sustainably, to ensure a viable and feasible future. With this said, we house the expertise to achieve success on the services we offer. In situations where additional resources are required, we either procure these services directly or partner with other reputable organizations to ensure that project success is achieved.

Our Leadership is steadfast, with a wealth of experience in the built-environment.

South Africa

Footprint

As with the nature of our business, our objective is to service all Provinces within the borders of South Africa, as well as provide services beyond our borders where required. **We are headquartered in Durban and have a footprint in these regions of South Africa.** However, we expand to new areas as directed by the business requirements.

Johannesburg | Cape Town | Bloemfontein | Polokwane | Witbank
